CS3103 Project: Overview

- There are two project options available: Project A and Project B.
  - Each group can choose either Project A or Project B.
  - Only students in the group choosing Project B are qualified for **A+** in the overall course grade. In other words, if a student is in a group choosing Project A, his/her overall course grade is at most **A**, regardless of the total score obtained.
  - Project A counts for 10% of the overall course grade.
  - Project B counts for 10%+5%=15% of the overall course grade, where 5% is considered bonus points. Note that, in any case, the total coursework point is capped by 40% of the overall course grade. For example, if a student gets the following coursework points (1 point corresponds to 1% weight of the final grade):
    - Tutorial: 4 (out of 4)
    - Assignment 1 & 2: 10 (out of 10)
    - Midterm: 15 (out of 16)
    - Project: 12 (out of 15 with Project B and got 80%, 15*80%=12)
    - Then the total coursework point is 4+10+15+12 = 41. However, since the total coursework point is capped by 40, so the final total coursework of this student is 40.

For detailed instructions on Project A and Project B, please refer to the following documents:
- "cs3103-project-A.docx" for Project A.
- "cs3103-project-B.docx" for Project B.

Submission due: Sunday, April 21, 2024, 11:59 pm HKT. **(10 marks deducted if late for <=12 hours, 20 marks deducted if late for 12-24 hours, and so on).**
